Summary

Computer Science Engineering student at Manipal University Jaipur (IoT & Intelligent Systems), CGPA **8.95**. Experienced in full-stack development, AI/ML pipelines, and cybersecurity. Published researcher (IJERT, IJRPR) with hands-on internship experience building production-grade systems.

Education

2023 – 2027	B.Tech, Computer Science (IoT & Intelligent Systems), Manipal University Jaipur	**CGPA: 8.95**
2022	Class 12th CBSE, Delhi Public School Ghaziabad Vasundhara	86.8%
2020	Class 10th CBSE, Father Agnel School, Noida	91%

Skills

Languages: C, Java, HTML, CSS, JavaScript, SQL, Python
Frameworks & Tools: Next.js, FastAPI, React, SQLite, Scikit-learn, Pandas, NumPy, Groq API, TMDB API
Technical: AI/ML, Full Stack Development, Cybersecurity, IoT Systems, Operating Systems

Work Experience

AI/ML Intern — IBM SkillsBuild (Edunet Foundation / AICTE) June 2025 – July 2025

- Built an end-to-end Employee Salary Prediction ML pipeline on **1,000+ records**; applied feature engineering, data preprocessing, and cross-validation across Random Forest and Linear Regression models.
- Achieved **R^2 of 0.85+** with Random Forest, reducing prediction error to **MSE < 1e7** — a **23% improvement** over baseline Linear Regression; deployed using Scikit-learn in a production-ready pipeline.

Undergraduate Researcher — Manipal University Jaipur Jan 2025 – Present

- Co-authored 2 published papers on ML-based healthcare classification and IoT/telemedicine data privacy: both papers under IEEE conference review.
- Developed a hybrid ML/DL breast cancer detection framework combining SVM and Random Forest (Wisconsin dataset) with ResNet50 on IDC histopathology images, achieving **>95% classification accuracy** on Wisconsin dataset and **>80% classification accuracy** on IDC histopathology images .

Projects

AI Chatbot — Full Stack (FastAPI + React + LLaMA 3.1) GitHub

- Built a production-ready AI chatbot using **FastAPI**, **React**, **SQLite**, and **Groq-hosted LLaMA 3.1**; deployed backend on Render, frontend on Vercel with **<500ms average response latency**.
- Implemented persistent multi-session conversation history, JWT-based auth, and RESTful API; delivered end-to-end in **72 hours** as part of a technical hiring challenge.

PicturesQue — AI Movie Recommendation System GitHub

– Built a personalized movie recommendation engine using cosine similarity (Scikit-learn) on **a 5,000+ movie dataset via TMDB API**, delivering relevant content suggestions based on user preferences.

– Designed a **Next.js + FastAPI** full-stack architecture with an interactive "Wrapped" dashboard (Recharts), enabling on-demand generation and download of personalized movie-watching reports.

GameXP — Gamified Loyalty Platform GitHub

– Built a gamified web platform with **5+ interactive games**, XP system, leaderboard, and badge engine using **HTML, CSS, and JavaScript**; implemented **LocalStorage**-based state persistence for seamless user experience.

– Designed a complete client-side reward and engagement loop with points, badges, and redemption flows, simulating real-world loyalty systems through interactive gameplay.

Car Parking Management System GitHub

– Engineered a parking management system with slot allocation and vehicle tracking for **10+ concurrent parking slots**; implemented automated fee calculation to streamline parking operations.

– Managed structured data using **CSV with SQL-like operations**, enabling real-time slot availability and a responsive user interface.

Publications

1) A Comparative Analysis of Decision Tree, KNN, and Naive Bayes for Classification Tasks *(IJERT, 2025)*
2) Privacy Paradox: Data Security in IoT-Driven Telemedicine *(IJRPR, 2025)*

Achievements & Extracurriculars

Honors: Dean's List (2×) & Student Excellence Award (2×), Manipal University Jaipur (2025-26)
Activities: MUN delegate and debate speaker (3+ tournaments); cricket ; casual competitive gaming
Soft Skills: Public speaking, team leadership, cross-functional collaboration under deadline pressure
